

Policy on Campus Management

Principles:

Our policy on campus management entails the aspect of cleanliness and beautification, which is focused on creating a clean, organized, and visually appealing campus environment. We believe that well-maintained and beautiful campus fosters a positive atmosphere for learning, working, and living. To achieve this, we have established strict standards for cleanliness throughout the premises. Regular cleaning schedules are implemented to ensure that common areas such as classrooms, corridors, common rooms, restrooms are kept clean at all times. Additionally, we prioritize proper waste management by providing ample trash bins in convenient locations and promoting recycling practices. Furthermore, our beauty efforts include maintaining gardens with vibrant flowers and plants, as well as attractive landscaping. We also encourage student involvement through campus beautification projects or initiatives aimed at enhancing the aesthetic appeal of our institution. This policy aims to adopt eco –friendly practices not only to make the campus clean, green and beautiful but also to sustain such serene environment for future.

Objectives:

- To maintain clean and hygienic environment that promotes positive atmosphere for learning and working
- To enhance the visual appeal of our institute by making it more attractive and visually pleasing.
- To focus on promoting environment friendly practices in the institute.
- To foster a sense of belonging and positive community engagement among stakeholders

In order to provide a clean and green environment on the college campus and to sustain a conducive- study environment, the institution follows cleanliness and beautification policies, which are discussed below.

- Regular cleaning of classrooms, desks, benches, and other items in the classrooms are carried out.
- Implementation of the "3Rs" (Reduce, Reuse, Recycle) policy on the campus.
- Awareness campaigns about cleanliness are conducted among students, and they are also encouraged to maintain personal hygiene.
- Ensuring proper use of dustbins and regular disposal of waste. A scientific waste management protocol and efficient waste disposal mechanism is a pre- requisite for maintaining a healthy and liveable environment in the college campus
- Maintaining the Swachh Bharat Abhiyan for cleaning for the campus.
- Conducting plantation programme by increasing green cover, improving air quality, and enhancing biodiversity.
